

# BIO 213 : Human Anatomy & Physiology

This course emphasizes the essential physiological principles underlying the function of the human body. The following systems and/or units will be covered: cells and tissues, muscular, nervous, endocrine, cardiovascular, blood, respiratory, digestive, urinary and fluid balance, and reproduction. (Not open to biology majors without special permission.)

**Credits** 4

**Prerequisites**

One semester of BIO, CHM or PHY or sophomore status (24+ credits)

**Advising Note**

Students also enroll in lab section. Students who take this course cannot also receive credit for BIO 201/202 due to overlap in course content.
